Welcome to MOLINOL

"The only way
to do great work
**is to love
what you do."**

Welcome to MOLINOL. A premium German lubricants brand. Having several facilities all over Europe, MOLINOL can be considered as one of the leading companies in the Automotive and Industrial fluid market.

Our portfolio of products consist of all Automotive & Industrial fluids in order to maintain all kinds of equipment. We do this by always listening to our partners and the market. This is the only way how we are able to respond to the market trends.

MAINTAIN OUR PRODUCTS - WORLDWIDE

All over the world our European products are being used. With our origin we as European's ship all our Vehicles, Equipment and Machines to anywhere in the world. We have decided that were going to develop a brand that is able to maintain all of these products in the best way possible, regardless where in the world!

Why are we Premium?

*We consider ourselves as “**Premium German Lubricants**”. In the current market it is difficult to identify yourself with truly premium products. The market is filled with replica's, with brand-copying and poor quality brands. We have decided that we stay close to our beliefs. Delivering highest quality without concessions. We do not want to be the biggest, we want to be the best. One that will last today, and tomorrow!*

AUTOMOTIVE LUBRICANTS

The heart of our company is developing lubricating products for the Automotive industry. Over 300 different formulations for passenger cars, heavy duty vehicles, ATF, Gear oils, Mining, Agriculture and construction. Ensuring every day that the world can keep on moving forward.

INDUSTRIAL LUBRICANTS

+900

Our industrial lubricants consist of over 900 specialties suitable for all different equipment. From hydraulic oils up to the most advanced biodegradable and Food Grade lubricants.

MOLINOL

PREMIUM GERMAN LUBRICANTS

WWW.MOLINOL.D

We are doing this by setting up a network in Germany, Belgium and The Netherlands. Until today these are the countries that have the highest available technologies concerning the lubricant & chemicals industry. It is in our regions where the first new vehicle technologies are being born. It is in our regions where the endurance of products is longer than anywhere in the world. And it is in our regions where we value international relationships and cultures. are so important that they are a daily factor of doing business. This is what makes us premium and that will give us the title Premium German Lubricants.

EVERYTHING IS POSSIBLE WITH THE RIGHT TEAM

Maybe the most important factor that we believe is necessary in order to stay the most premium lubricants brand is having the most amazing, dedicated team. Imagine a team that enjoys work so much, that it feels like a hobby rather than work. A team that goes the extra mile because they want to, not because they need to. And a team that is there for you now and in the future.

Yes, that is our team!

CHEMICALS & CLEANING

We have a complete chemical and cleaning assortment ensuring that equipment and vehicles can become and stay durable. We have products for interior & exterior cleaning, as well as concentrated Oil additives and Chemical products to maintain your complete vehicle and equipment assortment.

NOL®
LUBRICANTS

DE

Why MOLINOL?

Competitive advantage, price differentiation & providing the newest technologies are all arguments that our competitors provide in order to work with them. For us this is meeting the line, what makes us exceed the line compared to them? Call us and you will know immediately!

Of course it is difficult to try to state why you are better than others. We cannot state that we are better, but we can state where we stand for. **We stand for challenging the status quo by never taking anything for granted.** This results into the fact that we experience innovation in a way faster way than our competitors. We ask ourselves the question: How can we make things even better? This allows us to generate a continuous cycle of innovation and strenght that results into highly effective products and pioneering advantages.

HOW WE BELIEVE IN THE WORLD

When people think about Oil, they associate it with negativity like “pollution”, “climate change” and “Economy driver”. However we believe that we can be a part in a world where our business will be perceived as helpfull and environmentally sustainable.

Our products are formulated to generate longer drain intervals than the ones of our competitors. Our technologies are synthetically generated that leads to the lowest possible impact on the production process. Our packaging is environmentally sustainable and a large portfolio of our products is Biodegradable and Food Grade.

The world will move towards increased regulations, extremer quality constraints and governmental regulations. We at MOLINOL embrace this future as we are convinced our strenght and quality will be seen at its best when only the best will survive.

MOLINOL FORMULA

SAE 40

TDS 140100101

Mono Grade Engine Oil

API SF/CD - MB 226.0

These engine oils have the API SF/CD specification for passenger car engine oils and are perfectly suitable for the more traditional car portfolio. The API SF/CD specification on our engine oils refers to engines that service typical of certain naturally aspirated, turbocharged or supercharged diesel engines operated in moderate to severe-duty service, and certain heavy-duty gasoline engines. The higher SAE 40 grade is suitable for areas where the engines operate under high tropical circumstances. Concerning formulation these engine oils are made of natural, paraffinic base oils group I combined with special additive packages. These engine oils offer good resistance to oxidation and corrosion and protect the engine. Next to that these oils have a low ash content.

GOLD SYNTHESIS SL/CF

SAE
0W30

TDS 140100501

Full Synthetic Engine Oil
SL/CF
API SL/CF - ACEA A5/B5

This is a full synthetic engine oil that has initially been developed for Volvo passenger cars. It was specifically developed for the Volvo 5-cylinder engines. But the formulation of this product is also very suitable for the broader car portfolio and can be used for passenger cars, sports utility vehicles, vans and light trucks that are operating under the API SL specification. The specification A5/B5 on this product ensures that this product performs very well in engines that are designed of using Low Viscosity Oils with HTHS Viscosities of 2.9 to 3.5 mPa*s. This product can be use in gasoline as well as diesel engines.

GOLD SYNTHESIS SM/CF/EC

SAE
5W40

TDS 140100601

Full Synthetic Engine Oil
SM
API SM/CF - ACEA A3/B4

This product is a high quality full synthetic long-life engine oil that is recommended for all petrol engines with or without catalytic converter. It can also be used in diesel engines, turbocharged or naturally aspirated cars and light vans. This product is designed to provide improved oxidation resistance, improved deposit protection, better wear protection, and better low-temperature performance over the life of the oil. This product has the API SM specification but can also be used where older API specifications are applicable like SJ and SL.

Semi-Synthetic Engine Oil
SM

API SM/CF - ACEA A3/B4

This product is a high quality semi-synthetic long-life engine oil. This product can be used for the lubrication of all 4-Stroke gasoline and diesel engines, which makes it perfect oil for the whole fleet. It is also suitable for vehicles that operate with a direct fuel injection. The total engine protection of this lubricant ensures outstanding engine cleanliness and it is very suitable for cold starts and Start-Stop traffic. This product has the API SM specification but can also be used where older API specifications are applicable like SJ and SL.

Multi Grade Engine Oil
SL/CF

API SL/CF - ACEA A3/B4

This is a multi-grade engine oil that is developed for a wide vehicle portfolio and can be used in 4-stroke gasoline and diesel engines with or without turbo. It is developed for passenger cars as well as minibuses, vans and light trucks. One of the most important features of this product is that it is formulated to ensure total engine protection. The additives that are used in this formulation ensure that a good protective layer adds to the engine components. A result of this is that it provides very good cold start properties. This product is advised when there is a lot of city traffic where a lot of start-stop driving is applicable.

Full Synthetic Engine Oil

SN/CF

API SN - MB 229.5

This product is a very advanced full synthetic engine oil that has been developed for gasoline and diesel engines. The full synthetic technology in this engine oil is several times more able to effectively remove sludge and dirt from engines than a mineral oil. This product ensures that your engine is driving like new in all driving conditions. This product has a very rapid engine protection start up, which makes it perfect for short distance driving and start-stop driving. Also the specifically designed additive package ensures that dirty engines are cleaned tremendously. This product is very suitable for engines that include turbo-chargers, direct injections diesels and Hybrids. Please note that this product is not suitable for vehicles with DPF filters.

API SN PLUS - ILSAC GF-5

Today's engines are smaller, more efficient, more advanced and more powerful. Because of this, these engines need to operate in more extreme conditions. If not good protected by good oil, the cylinder walls, pistons, piston rings, connecting rods and spark plugs can cause permanent damage. This product has been formulated with sophisticated European base oils and additives that prevent this from happening. This is a full synthetic engine oil that we have specifically formulated for consumers that would like to experience an extreme high level of fuel economy in their gasoline passenger car, SUV, van or light truck. This all year round oil is developed in order to meet the challenging requirements of fuel efficient combustion vehicles as well as hybrid vehicles where CO2 reduction is very important. Also this product its very low viscosity ensures that it significantly reduces wear, soot ad deposits and keeps the engine clean.

If not good protected by good oil, the cylinder walls, pistons, piston rings, connecting rods and spark plugs can cause permanent damage. This product has been formulated with sophisticated European base oils and additives that prevent this from happening. This is a full synthetic engine oil that we have specifically formulated for consumers that would like to experience an extreme high level of fuel economy in their gasoline passenger car, SUV, van or light truck. This all year round oil is developed in order to meet the challenging requirements of fuel efficient combustion vehicles as well as hybrid vehicles where CO2 reduction is very important. Also this product its very low viscosity ensures that it significantly reduces wear, soot ad deposits and keeps the engine clean.

Fuel Economy Engine Oil
VW 508.00 - VW 509.00

This product is specifically formulated for vehicles that require the VW 508.00 / 509.00 specification. It is made of full synthetic base oils and it is developed in order to extend the lifetime and maintain efficiency of emission systems. The 508.00 (which is designed for gasoline engines) and 509.00 (which is designed for diesel engines) specifications represent the high levels of fuel economy that can be used with these lubricants. This product is developed for mandatory use in the newest 2.0 TFSI 140 kW and 3.0 TDI CR 160 kW engines. Please take into consideration that these specifications are not backward compatible with the earlier VW specifications.

Fuel Economy Engine Oil
VW 506.01 - VW 506.00

This full synthetic engine oil is formulated for the VW group. This product can be used in petrol and diesel engines. These oils are especially for Petrol "Pumpe-Duse" (unit injector or PD engines) engines running on extended service intervals (30.000 – 50.000 km / 24 months). They are also particularly suitable for diesel engines with extended service intervals of up to 50.000 km / 2 years. They cannot be used for engines with a single injector pump. This engine oil has very high fuel saving properties. This oil should not be used in engines where the VW 503.01 is required.

ACEA C2-C3 - API SN/CF

This is a full synthetic engine oil that can be used in petrol as well as diesel engines. One of the big advantages of this motor oil is that it can obtain a significant fuel economy result compared to other more standard engine oils. This product has specifically been formulated for the BMW group passenger car vehicles, but can also be used in other vehicles that require a high quality 0W30 fuel economy engine oil. The BMW LL-04 specification on this product means that BMW approved it for fully synthetic long life engine oils. They can be used in vehicles that are equipped with a diesel particle filter (DPF). Note that this product can also be used in vehicles that require an older specification: BMW LL-01 & BMW LL-98. The formulation of this product also meets the Mercedes Benz MB 339.31 specification which means that it at least realizes a 1% fuel saving on used fuel in the M111 Fuel economy test.

MID SAPS Engine Oil C3
ACEA C3 - API SN/CF

This is a full synthetic engine oil that is formulated to meet one of the highest VW group specifications. It meets the VW 504.00 – 507.00 as well as the LL-III of the VAG group. This product is part of the MID SAPS category and can be used in gasoline and diesel engines. This product can also be used in the older specifications of the VAG group as 502.00 – 503.00 503-01 – 505.00 – 506.00 and 506.01. The low viscosity of this product ensures that a fuel saving of 2% can be made. It has full after treatment protection. This product is formulated in order to keep on performing, even after long service intervals. For gasoline passenger cars the extended drain interval can reach up to 30.000 km. For diesel engines even up to 50.000 km. Next to this, this lubricant ensures excellent oxidation stability and anti-wear protection. Note: For V10 TDI and 5-cylinder 2.5 TDI engines, prior to 2007, where the 506.01 specification has to be used, this oil is not recommended.

MID SAPS Engine Oil C5
ACEA C5 - ACEA A1/B1

This is a full synthetic lubricant based on carefully selected very high quality base oils, specially developed for the gasoline and diesel direct injection Volvo Engine Architecture (VEA) engines. This VOLVO VCC RBS0-2AE specification demands high oxidation stability to ensure long oil drain intervals of up to 30000 km. There is a fuel economy benefit over a reference oil of 3,4 %. This product was primarily developed for mandatory use in the gasoline and diesel direct injection Volvo Engine architecture (VEA) engines. This product is also usable for other OEM's passenger cars requiring this viscosity grade and ACEA A1/B1 performance, thus providing a multi vehicle oil application. It provides an extremely quick and stable lubricant film at the cold start at low temperatures and offers high thermal stability under heavy duty operating conditions.

LOW SAPS Engine Oil C1
ACEA C1 - FORD

This C1 oil is a high quality full synthetic lubricant for the use in gasoline and diesel engines of passenger cars, vans and light duty vehicles. This lubricant is based on the most advanced low SAPS technology with a minimum HTHS viscosity of 2.9 mPa.s. Meaning that this product can be particularly useful when low sulphated ash, phosphor and sulphur contents are required. It enhances the lifetime of the DPF and the TWC and maintains the high fuel economy rating of the engine. These oils have a typical lower viscosity in order to ensure optimal fuel consumption during short drives. Important: as these oils have the lowest SAPS technology, they are unsuitable for some engines. Consult the owners manual if in doubt.

Full Synthetic Engine Oil

SM

API SM - BMW LL-01

This is a full synthetic engine oil that offers excellent fluidity at low temperatures. A result of this is that this product can be used perfectly in engines that have start-stop mechanisms or vehicles that are used for short-distance driving. This product can be used in all 4-stroke engines, four-valve, turbocharges, and 4-stroke diesel engines with or without turbo. Please note that this product is not suitable in vehicles that have diesel particle filters.

MID SAPS Engine Oil C2

ACEA C2 - FORD

This is a full synthetic engine oil that has been developed for the EURO 6 TDCI Duratorq engines in Ford engines after 2004. This product includes one of the latest technology Viscosity Index Improvers. This ensures that this product lasts very long before it needs oil changes. This product is developed for mandatory use in the newest EURO 6 TDCI Duratorq Ford engines. This product is also usable for other passenger car engines requiring a 0W30 viscosity grade and the ACEA C2 performance. This product provides total engine protection and can be used in start-stop driving and short distance driving because of its excellent cold start properties.

MID SAPS Engine Oil C2
ACEA C2 - PSA B71 2312

This is a full synthetic engine oil that is developed for the PSA EURO VI Blue HDi DW10F engines with exhaust after treatment and turbocharger. The ACEA C2 specification ensures that it is also particularly suitable in vehicles outside the PSA group as well. One substantial property of this oil is that a fuel economy of over 4% is generated. This product has been developed specifically for vehicles that have start-stop mechanisms. Because of its excellent cold start properties it provides excellent engine protection at engine lower temperatures. This product is perfectly suitable for vehicles that ensure extended service intervals.

2-Stroke Motorcycle Oil
API TC -

This product is suitable for 2-stroke small air-cooled and water-cooled 2-stroke engines. They are formulated for engines up to 50 cc with or without injection system. They can be used in motorcycles, scooters, pumps, lawn mowers as well as small generator sets. This product is very easily mixable with (lead-free and super) petrol. It prevents deposits on spark plugs, pistons, carbon deposits on inlet and exhaust ports, sticking piston rings. This product can be mixed 1:50 unless prescribed otherwise by the manufacturer.

MOLINOL ATF

UNIVERSAL DEX VI

TDS 140700701

Universal ATF Dexron VI
GM DEXRON VI - MB
236.41

This ATF VI is an all-round low viscosity Automatic Transmission Fluid. It is developed particularly for automatic transmissions that require low viscosity automatic transmission fluids. This ATF VI ensures easy shifting under all operating temperatures and can be used in a wide temperature range because of its low pour point. Also, this ATF VI easily meets prescribed intervals because of its excellent oxidation and thermal stability. This product cannot be used in DTC's and CVT's or when an oil with Ford Type F/G is prescribed.

MOLINOL ATF

UNIVERSAL SEV

TDS 140700801

Universal ATF
CHRYSLER ATF +4 -
HYUNDAI SP-III

This ATF is a synthetic transmission oil with extra added friction modifiers in order to gain excellent properties. This ATF can be used for automatic transmissions that are used in several Northern American, European and Asian cars. It meets several OEM specifications like the Ford Mercon V and the Mercedes Benz 236.6. It has a very high viscosity index. Because of its low pour-point it is perfectly suitable for cold starts and operates well in cold climates. It has excellent oxidation stability, anti-wear, anti-corrosion and anti-foaming properties.

MOLINOL ATF

CVT

TDS 140701501

**Continuous Variable
Transmission Fluid
Hyundai SP CVT - Ford CVT**

This is a full synthetic continuous variable transmission fluid that is developed for the modern continue variable transmissions. This product provides protection of metal-to-metal contact points and the belts and pulleys. It has excellent corrosion protection properties and increases the transmission lifetime. This product is specially formulated for the use in CVT boxes that use steel push-belts or chains. Please note that this product is not suitable for Hybrid vehicles.

MOLINOL ATF

DCT

TDS 140701601

**Double Clutch
Transmission Fluid
MB 236.21 - MB 236.25**

This is a full synthetic automatic transmission oil that has been developed for transmission with dual clutch transmissions (DCT). The dual clutch has initially been developed for racing and is based on the fact that the transmission has two clutches. One clutch is for the even gears, and the other for the uneven gears. This product is specifically formulated for this type of transmissions. Because the transmission does not shift between gears but between clutches, extreme pressure performance and friction prevention properties are needed. This product is developed in a way that even under extreme pressure conditions, this product does not lose its quality. It ensures trouble-free operation of DCT gearboxes. This product can be used for Direct shift Gearboxes (DSG) of the VAG group, as well as other 6-speed DCT transmissions, such as Ford Powershift, Chrysler Powershift, Volvo Powershift, Mitsubishi TC-SST, BMW Drivelogic 7-speed, etc. This product is NOT intended for VW dry clutch DSG type 0AM, 02M, 02Q and 02S.

API CG-4/SJ - Volvo VDS 2

This is a diesel engine oil that has been made from high quality European base oils and additives. This product is very suitable for the more traditional car portfolio that has usage all-year round. The product enhances longer drain intervals and complies with EURO II and EURO III emission norms. This product can be used in all modern diesel engines with natural aspiration or turbocharging.

Heavy Duty Engine Oil
API CH-4/SJ - ACEA E5

This is a high-quality diesel engine oil that meets a variety of American and European specifications. This product can be used in EURO II, EURO III and some EURO IV engines (not with DPF filter). This product is perfectly suitable for the whole heavy-duty portfolio like modern diesel trucks, off-road equipment and other heavy material. Also this product is very suitable for passenger car diesels, vans and light trucks. The product has been formulated in order to extend the drain interval of the lubricant and has excellent anti-corrosion properties.

LOGISTIC TRUCK CI-4 E7

TDS 140201301
Heavy Duty Engine Oil
API CI-4/SH - ACEA E7

This product is a high-performance diesel engine oil that is developed according to one of the latest emission regulations. This product is suitable for heavily loaded diesel engines. The product can be used in modern diesel engines of trucks, buses, off-road equipment and other heavy-duty materials. This product is highly recommended for diesel engines that meet EURO I, EURO II, EURO III, EURO IV and EURO V emission requirements. It can be used in vehicles with or without DPF filters and is also applicable in vehicles with SCR NOx reduction systems. It is an excellent product that performs well under extreme operating conditions and increases the lifetime of the equipment. This is a perfect product for the complete fleet.

LOGISTIC TRUCK CI-4 XT E7

TDS 140201701
Heavy Duty Engine Oil
API CI-4/SL - ACEA E7

This is a synthetic heavy duty truck engine oil that as very high TBN additives compared to other CI-4 engine oils. This results into extreme engine protection to trucks, off-road equipment and construction vehicles. This product is suitable for European as well as American gasoline and diesel engines and ensures emission norms EURO II, EURO III, EURO IV are met (not suitable for vehicles with DPF). This product is suitable for the whole fleet, offers a very good stability and keeps the engine very clean.

Full Synthetic Heavy Duty
Engine Oil
API CI-4 - ACEA E4/E7

This is a full synthetic heavy duty engine oil that is classified under: UHPD (Ultra High Performance Diesel). Because of the synthetic base oil, this product has a naturally high viscosity index that ensures optimal protection against wear and ageing. This product can only be used in diesel engines and engines that are equipped with Diesel Particle Filters. This product significantly reduces fuel consumption and CO2 emissions and is specifically developed in order to meet the strong EUROPEAN emission regulations. This product can be used perfectly all-year round and provides easy starting properties even in winter conditions. This oil is not suitable for vehicles fitted with particulate filters. Recommended for turbocharged and naturally aspirated diesel engines.

**Semi-Synthetic Heavy
Duty Engine Oil**
API CI-4 - ACEA E4/E7

This is a semi-synthetic heavy duty engine oil that has been officially qualified as LONG DRAIN in the UHPD (Ultra High Performance Diesel) category. This product can be used in supercharged diesel engines that operate under all service conditions and in all seasons of the year. One of the typical properties of this product is that it helps to protect the turbocharger by cooling and lubricating the bearings. This product provides very long drain intervals and provides excellent engine cleanliness. This is a perfect HD engine oil for vehicles that are used daily. Due to the high ash content, this oil is not suitable for gasoline engines and vehicles equipped with a particulate filter.

EXTENDED S3 CF E4/E7

TDS 140202201

**Full Synthetic Heavy Duty
Engine Oil**
API CI-4 - ACEA E4/E7

This is a full synthetic heavy duty engine oil that has been classified as LONG DRAIN. This product can be used in passenger car diesel engines, trucks and off-road equipment. The full synthetic base oils ensure a stable viscosity index, easy cold start properties and very long drain intervals. This ensures optimal fleet usage all year long. This product is suitable for EURO IV and EURO V engines and substantially reduce the emission exhausts. Due to the high ash content, this oil is not suitable for most engines and vehicles equipped with a particulate filter.

TDS 140202301

Full Synthetic Heavy Duty
Engine Oil
API CI-4 - ACEA E6/E7/E9

This is a full synthetic heavy duty truck engine oil that is specifically recommended for large truck engines that require EURO V emission standards. Also this product can be used very well in engines that need EURO IV emission standards and older (EURO III , EURO II). This product is perfectly compatible with all after treatment systems and EGR SCR and DPF. The full synthetic base oils of this product ensure very long and stable drain intervals. This product functions very well all-year round and provides sufficient fuel economy figures compared to more traditional mineral heavy duty engine oils.

DURABLE FA-4

SAE
5W30

TDS 140203301

Full Synthetic Heavy Duty
Engine Oil
API FA-4 - MB 228.61

This is a full synthetic heavy duty engine oil that improves over 2% fuel economy properties compared to more traditional CJ-4 oils. This product can be used in vehicles that are equipped with turbochargers, superchargers and other after-treatment devices. When this product is used, the engine its energy loss is decreased significantly. This product provides extreme engine protection and has excellent oxidation control and shear stability.

LOGISTIC TRUCK CI 4 E7

SAE
15W50

TDS 140203401

Heavy Duty Engine Oil
API CI-4/SL - ACEA E7

This product is a high-performance diesel engine oil that is developed according to one of the latest emission regulations. This product is suitable for heavily loaded diesel engines. The product can be used in modern diesel engines of trucks, buses, off-road equipment and other heavy-duty materials. This product is highly recommended for diesel engines that meet EURO I, EURO II, EURO III, EURO IV and EURO V emission requirements. It can be used in vehicles with or without DPF filters and is also applicable in vehicles with SCR NOx reduction systems. It is an excellent product that performs well under extreme operating conditions and increases the lifetime of the equipment. This is a perfect product for the complete fleet.

MOLINOL GEAR GL-4 ZF

SAE 90

TDS 140601101

Zinc Free Universal Gear
Oil
API GL-4 - MB 235.1

This is a mineral GL-4 manual transmission gear oil that meets the requirements of MB and ZF. This product can be used in manual synchromes gear boxes, transfer boxes and mechanical steering controls. Extreme pressure additives are added to this gear oil in order to extend the transmission lifetime, ensure smooth gear shifting and reduce vibrations. This product has superior quality compared to normal GL-4 gear oils.

MOLINOL GEAR GL-4 +

SAE
75W90

TDS 140601201

Universal Gear Oil GL-4 +
API GL-4 - BMW MTF LT-4

This is a full synthetic manual gear oil with the GL-4 + specification. This product significantly improves the gear shifting and ensures easy gear shifting at high temperatures. This product is specifically developed for gearboxes with integrated differentials of front-wheel driven vehicles. This product has an excellent thermal and oxidation stability and significantly extends the transmission life.

Universal Gear Oil GL-5
API GL 5/4 - API MT-1

This is a full synthetic GL-5 manual transmission gear oil that is known for its wide universal use. This product can be used in all gearboxes, transfer boxes and differentials of trucks and 4-wheel drives. This manual gear oil is suitable for synchronized gearboxes as well as heavily loaded differentials. This gear oil performs very well in severe conditions. This product contains effective anti-scuffing additives and can be used for hypoid gears that have significant displacement of axes. This product operates under various combinations of high-speed/shock load and lowspeed/high-torque conditions.

This is a synthetic based GL-5 manual transmission gear oil that is known for its wide universal use. This product can be used in all gearboxes, transfer boxes and differentials of trucks and 4-wheel drives. This manual gear oil is suitable for synchronized gearboxes as well as heavily loaded differentials. This gear oil performs very well in severe conditions. This product contains effective anti-scuffing additives and can be used for hypoid gears that have significant displacement of axes. This product operates under various combinations of high-speed/shock load and lowspeed/high-torque conditions. This product can also be used very well in applications where GL-4 is prescribed.

MOLINOL GEAR GL-5

TDS 140601501
Universal Gear Oil GL-5
API GL-5 - MAN 342 M-2

This is a high quality mineral gear oil that has been specifically developed for extreme pressure circumstances and meets that GL-5 specification. The anti-friction additive packages that are used in this product ensure easy shifting. This product is specifically developed to avoid corrosion of copper alloys and can be used in syncromesh gearboxes, transfer boxes, mechanical steering controls and most rear axles. The Anti-wear properties of this products ensure long transmission life. This gear oil performs very well in severe conditions. This product contains effective anti-scuffing additives and can be used for hypoid gears that have significant displacement of axes. This product operates under various combinations of high-speed/shock load and lowspeed/high-torque conditions.
